Transmittal

DATE: September 6, 2022
TO: Alleghany County Water District;
Rae Bell Arbogast, General Manager
FROM: Kip Lybarger, Altec Engineering
RE: Ram Springs Improvements Construction Engineering

Rae Bell,

This letter is to notify the Board of Directors that Altec Engineering is respectfully choosing to not submit an Engineering Proposal for the Ram Springs Construction Engineering project.

As the Principal in the business, and after spending over 40 years in the engineering and surveying field, I will be shifting towards retirement mode over the next few months, with a bit of work as a consulting engineer.

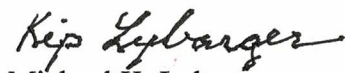

Also, the District has indicated in the RFP that weight will be given to the proximity of an engineering firm to the Town of Alleghany. That is very understandable. Altec Engineering is located outside of the local area, and so this has also helped in our decision.

It has been a privilege to serve ACWD over the past few years; to help the community with their water system projects, and provide a bit of gratis work for the fire district. Also, thankfully, through a great deal of effort on your part, along with contributions from Altec, I am hopeful that the District has survived a most rigorous audit by the State of California.

I want to assure the District that I will be available to participate with you and a new engineering firm during the transition period. Also, if ACWD is not successful in procuring engineering services, please know that I would be available and very willing to complete the project with the District.

Thank you.

Sincerely,

Michael K. Lybarger
Altec Engineering
