3. Information/Discussion Items:

a) **Correspondence:** Not gathered in time for meeting.

b) **SRF Projects Update:** Written report provided. Additionally, Bruce Coons reported that the repairs to the new tank were underway. The town is on the smaller tanks during the repair work. The workers are doing a good job and should be done by Wednesday night.

c) **Board Member/Staff Reports:** GM report provided in packets. CWO Bruce Coons reported that he forgot to get the total gallons of finished water produced for May from the pumphouse but the average GPM from the driven pipes was 62.8.

The Chlorine residual in the system is being kept higher than normal during the repair work on the big tank as a precaution.

Both the Raw and Finished water Bacteria reports for May came back clean. (less than .01 PPB) The finished water test was conducted on a residence on Miners Street that had complained about the taste and smell of thier water. It was noted that because of fewer occupied residences at the bottom of Miners Street the water in that section of the system can stand for longer periods of time, but the test results were good.

The temporary tanks are fixed (tops popped out) but valves still need to be installed for the State to allow us to keep them on permanent stand-by. Bruce hopes to work on this during the summer.

d) **Historical Church/Library Report:** Written report provided in packets. Shingle repair job done within budget.

e) **Park Report:** Dean Hooley mowed the park but it still needs some weedwacking around the edges. A thank you card will be sent to him. The water has been turned back on and the park was watered to help drain the big tank for the repair job this week.
