3. Engineer Chad Coleman Q. and A.

- ~ Tank Repairs: 'Everything is going as hoped.'
- ~ They will be working with the contractors and making sure all the parts are 'good'; also the contractors will extend the warranty by 3 years for new parts and 2 years for everything else after the work is done.
- ~They will replace the panels 1 or 2 at a time; the panels will then be coated and the floor and ladder in the tank will also be replaced. There will be two independent inspectors to thoroughly check the coating.
- ~Bruce asked about whether or not they would be putting anodes in. Chad explained that the project does not include this in the funding agreement. We have applied for funding for the anodes depending on the timing it may or may not be part of the initial repairs.
- ~Vicky asked if the project would be completed before snow fall. Chad says it should begin 'soon', but did not have an exact date. He said they should begin around October or November.
- ~Rae wondered if the question about the time of the warranty was holding up the project, but Chad stated that he didn't think this was the case.
- ~Rae also asked if Chad, as the engineer, thought that the warranty offer the water district is getting is a good one. He said he thinks it is a good warranty offer and, again, feels that everything should hold up well.
- ~Bri asked when the warranty would actually begin and Chad said the extended warranty begins on the day of the completion of the project.
- ~A motion was made by Robbin DeWeese to accept the Warranty extension as proposed and Brianne Price 2nds.
